

## Neuropsychological Evaluation Information Sheet

Neuropsychological Evaluations at Therapy Changes are offered for **adults, adolescents, and children** to provide a comprehensive view of various aspects of a person, including intellectual aptitude, academic ability, information processing, attention, memory, emotion and personality, as well as the assessment of Attention-Deficit Hyperactivity Disorder (ADHD).

### PHASE 1: Intake Interview

The purpose of this 60-minute interview is to obtain background information, discuss your concerns, and identify the objectives for the evaluation.

### PHASE 2: Psychological Testing

Testing may take place over the course of one or more sessions lasting 1-2 hours per session. The total testing time usually ranges between 4 – 8 hours, depending on the individual needs of the client, which is determined during the intake interview.

### PHASE 3: Scoring, Interpretation, and Report Writing

Your therapist will score and interpret the results from testing. Your therapist may also prepare a report or complete the appropriate forms or documentation for your specific situation. The amount of time dedicated to this process typically ranges from 3 – 6 hours.

### PHASE 4: Client / Parent Feedback Meeting

Your therapist will invite you to a 60-minute feedback meeting to provide interpretation about the testing results, review diagnostic impressions, and discuss treatment recommendations. Following the completion of the testing process, your therapist will remain available to you to answer questions and offer assistance in the coordination of care with schools, employers, attorneys, or other health professionals.

### Fees

Obtaining a Neuropsychological Evaluation is an investment in yourself and your future. The fees at Therapy Changes for Evaluations are \$150 per hour. During the Intake Interview, you will receive an estimate of charges for the remainder of the evaluation. If, after the initial interview you decide to move forward with Phase 2-4 of the process, the cost of your initial meeting will be credited to the total cost of the evaluation. Before scheduling a testing session, a \$600 deposit will be required. **The cost for a typical Neuropsychological Evaluation starts at \$2,400 and an assessment for ADHD starts at \$1,600.**
